Corrigendum

Corrigendum to “The G protein-coupled receptor N-terminus and receptor signalling: N-tering a new era” [Cellular Signalling 2017 May;33:1–9]

J.L.J. Coleman^{a,b,*}, T. Ngo^{a,b}, N.J. Smith^{a,b,1,*}^a Molecular Pharmacology Group, Victor Chang Cardiac Research Institute, Darlinghurst, NSW 2010, Australia^b St Vincent's Clinical School, University of New South Wales, Darlinghurst, NSW 2010, Australia

The authors regret to inform readers of a correction to their review of N-terminal processing and signalling. We make several references to a paper in Science Signalling that has been retracted due to a cloning error we discovered with one of our constructs (DOI: [https://doi.org/](https://doi.org/10.1126/scisignal.aba2063)

[10.1126/scisignal.aba2063](https://doi.org/10.1126/scisignal.aba2063)). As a result, references to N-terminal inactivation of GPR37L1 by a matrix metalloprotease must be disregarded. No other parts of the review are affected.

The authors would like to apologise for any inconvenience caused.
